The Toronto Green Community (TGC) is a non-profit, grassroots organization whose overall goal is to engage communities in local environmental action for a cleaner, greener Toronto. Since 1995, our activities have highlighted a variety of key environmental issues, including climate change, toxic waste, atmospheric pollution, and stream water management. Under our five core pillars of 'Water,' 'Waste,' 'Energy,' 'Green Spaces,' and 'Food,' we strive to promote environmental stewardship in the 21st century by creating unique, innovative programming that is both sustainable and community-oriented.
